

**TOWN OF GENOA, CAYUGA COUNTY, NEW YORK  
LOCAL LAW NUMBER 2 OF 2014**

**TO EXTEND LOCAL LAW NUMBER 1 OF 2013 FOR  
AN ADDITIONAL PERIOD OF THREE MONTHS**

**Be it enacted by the Town of Genoa as follows:**

A LOCAL LAW IMPOSING A 3-MONTH EXTENSION OF LOCAL LAW NUMBER 1 OF 2013 ENTITLED "MORATORIUM AND PROHIBITION WITHIN THE TOWN OF GENOA OF NATURAL GAS AND PETROLEUM EXPLORATION AND EXTRACTION ACTIVITIES, THE UNDERGROUND STORAGE OF NATURAL GAS, AND THE DISPOSAL OF NATURAL GAS OR PETROLEUM EXTRACTION, EXPLORATION, AND PRODUCTION WASTES."

**ARTICLE 1. TITLE.**

This Local Law shall be referred to as the "Local Law #2 of 2014."

**ARTICLE 2. PURPOSE AND INTENT.**

By the enactment of Local Law #1 of 2013, the Town of Genoa legislatively found that the imminent potential development of oil and gas reserves through HVHF, solution mining processes, and oil and gas development processes created certain risks that the Town Board needed to address prior to any Town or State permitting of such activities, including, without limitation, the protection of roadways and regulation of traffic impacts, the protection of aquifers and surface air and waters, and the protection of the public health and weal, among others. The Town of Genoa thus desires to continue aquifer analyses and consideration, continue development of road use regulations, continue the identification and consideration of scenic areas, the preservation of lake views and viewsapes, the study and designation of critical environmental areas, and the protection of wetlands, including wetlands of local importance, the protection of agriculture and air and water quality, and to consider local laws to regulate or prohibit certain of such activities within the Town.

The Town has discovered, in attempting to complete such analyses and studies, that several of the same are lengthy and complex issues, both factually and legally, including the processes of mapping aquifers and obtaining roadway engineering data to support road use regulations or agreements. In order to more effectively protect the health, safety and welfare of the community, and to help assure the orderly development and use of lands within the Town, and to examine the impacts of oil and gas development projects upon the town, its properties, infrastructure, and citizenry, the Town of Genoa has legislatively determined that the existing moratorium needs to be extended.

The Town believes, based upon progress to date, that critical regulations may be emplaced within such additional 3 month period, and that, therefore, extending the existing moratorium for another year is reasonable and necessary. Therefore, pursuant to the statutory powers vested in the Town to regulate and control land uses, and to protect the health, safety and welfare of its residents, the Town Board of the Town of Genoa hereby declares an additional 3 month moratorium on certain oil and gas development activities as defined in Local Law #1 of 2012 (the bulk or whole of which is hereby incorporated below), including all defined Natural Gas and Petroleum Exploration and Extraction Activities, Underground Storage of Natural Gas activities, and the Disposal of Natural Gas or Petroleum Extraction, Exploration, and Production Waste activities, each and all of which shall

remain prohibited so as to allow the Town to address, in a careful manner and upon a Town-wide basis, rather than on an *ad-hoc* basis, the issues presented by oil and gas and solution mining, storage, extraction, and production waste disposal.

### **ARTICLE 3. SCOPE OF CONTROLS.**

All terms, conditions, clauses, requirements, and procedures of Local Law #1 of 2013 are incorporated herein and re-stated as follows, such re-statement being a material part of this Local Law #2 of 2014:

#### **Section 2. AUTHORITY AND INTENT; FINDINGS; PURPOSE**

A. This Local Law #2 of 2014 (for purposes of this Article 3, referred to hereafter as the or this "Local Law") is intended to be consistent with and is adopted pursuant to the authority granted to the Town Board under the New York State Constitution and the laws of the State of New York, including, but not limited to, the following authorities: New York State Constitution Article IX, Section 2(c)(6), 10; Municipal Home Rule Law § 10; Statute of Local Governments §10, Environmental Conservation Law § 17-1101 and § 27-0711, and Public Health Law §§ 228(2), (3).

This Local Law is a police power and land use regulation. This Local Law is intended and is hereby declared to address matters of local concern, and it is declared that it is not the intention of the Town of Genoa (the "Town") to address matters of statewide concern. This Local Law is intended to act as and is hereby declared in exercise the permissive "incidental control" of a land use law that is concerned with the broad area of land use planning and the physical use of land and property within the Town, including the physical externalities associated with certain land uses, such as negative impacts on roadways and traffic congestion and other deleterious impacts on a community.

B. The Town Board has found, determined, and made the following declarations and findings:

1. Genoa is a community in the southwestern corner of Cayuga County that takes great pride in, assigns great value to, and desires to protect, its rural-agrarian character, small-town atmosphere, high-quality agricultural land, and cultural, historic, scenic and other natural resources such as Cayuga Lake.

2. Residents of the Town are dependent upon aquifers and wells for life-sustaining water. Maintaining the quality of water resources within the Town is critical to protecting the natural environment of the Town, the general health and welfare of Town residents, and the local economy. Certain of the activities described in Article 3, Section 4 of this Local Law have the potential to damage surface and ground water resources in the event of (by way of example) human error, power outages, flooding or other natural disasters, or engineered materials and structures experiencing stresses beyond those for which they were designed. Further, water pollution is hazardous to the public health. If a domestic water source is contaminated, remediation is time and cost intensive and may not restore the water resource to a quality acceptable for domestic use. The Town Board believes it is appropriate to evaluate the effectiveness of aquifer protection legislation as one tool to fortify the Town's water resources and protect them from potential damage; and, if appropriate, to draft and enact such legislation.

3. Preservation of the Town's irreplaceable scenic sites, its air and water quality, its priceless and unique rural character, and its inventory of unique natural areas and communities, is of significant value to the inhabitants of the Town and to the tourists who visit. In order to protect such Town assets in the face of significant development pressures, the Town Board believes it is appropriate to consider the identification and designation of Critical Environmental Areas within the Town.

4. The Town's rich natural environment is a valuable asset that creates a sense of identity and well-being for residents of the area. Preserving and protecting the agricultural, scenic, recreational, and other natural resources of the Town is important for both a healthy environment and vibrant economy. Aesthetic issues are real and evoke strong reactions from people, and they deeply affect: the way people feel about a place, whether businesses will want to locate in a place, and whether people will want to live in and visit a place.

5. Allowing the activities described in Article 3, Section 4 of this Local Law could impair the existing character of the Town because, by their very nature, such activities have the potential to produce a combination of negative impacts upon the environment and people living in or in proximity to the communities and areas where such activities occur. Such negative impacts may include, without limitation, traffic, noise, vibrations, fumes, damage to roadways, degradation of water quality, degradation of air quality, decreased availability of affordable housing, damage to and loss of agricultural lands and soils, damage to and loss of open space, natural areas, and scenic views, decreased recreational opportunities, and damage to the tourism industries.

6. If one or more of the activities described in Article 3, Section 4 of the Local Law are conducted within the Town, traffic generated thereby could be hazardous or inconvenient to the inhabitants of the Town and pedestrians (especially children), cyclists, and motorists. Such traffic could result in traffic congestion that could delay emergency response times for medical emergencies, fires, and accidents. Certain of the activities described in Article 3, Section 4 of this Local Law also typically involve a large volume of heavy vehicles, and accidents involving such vehicles have a greater potential for causing damages, severe injury, and death than those involving smaller vehicles. These incidents are more likely to occur on roads (such as many roads in the Town) that have sharp corners, narrow lanes, or short sight lines. Thus, an increased volume of heavy vehicle and truck traffic may create unsafe conditions for the traveling public and a strain on emergency responders. Increased truck traffic increases air pollution and noise levels, and decreases the quality of life and property values for those living nearby. Further, roads are a critical public resource and constitute a major investment of the public's money. Many Town roads are "highways by use" (as contemplated by Section 189 of the NYS Highway Law) and thus are not necessarily engineered or able to carry repeated heavy legal limit loads. The Town is not in a position to bear the high costs associated with the road use impacts that typically accompany many of the activities described in Article 3, Section 4 of this Local Law. The Town Board believes it is appropriate to evaluate the effectiveness of road use legislation as one tool to protect the Town's resources from such costs and damage, and, if appropriate, to develop a road use policy and enact legislation to protect Town taxpayers from having to shoulder the burden of repairing or rebuilding roads damaged by activities described in Article 3, Section 4 of this Local Law.

7. If one or more of the activities described in Article 3, Section 4 of this Local Law are

conducted within the Town, the air pollution, dust, and odors generated thereby (whether onsite or by truck traffic to and from the proposed site of such activities) could be hazardous to the inhabitants of the Town. Air pollution is a known hazard to the public health.

8. If one or more of the activities described in Article 3, Section 4 of this Local Law are conducted within the Town, noise, vibrations, and light pollution typically caused by such activities could be hazardous or inconvenient to the inhabitants of the Town. Noise, traffic congestion, nighttime lighting, and vibrations can have negative effects on human health and wildlife.

9. The creation, generation, keeping, storage or disposal of Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes (as that term is defined in Article 3, Section 3 of this Local Law) within the Town could have a negative impact on the public health, safety, and welfare of the inhabitants of the Town. As well, there are substantial fiscal risks arising from such activities in terms of the need for the clean up, removal, and/or remediation of such wastes and lands upon which the same are generated, deposited, or emitted, whether purposefully or accidentally, including potential liability for such deposits or emissions.

10. The high costs associated with the disposal of Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes (as that term is defined at Article 3, Section 3 of this Local Law) have in other localities resulted, and could in our Town result, in persons seeking to avoid such costs by depositing such material along roadways, in vacant lots, on business sites, in the private dumpsters of others, or in other unauthorized places. Such activities could pose a hazard to the public health, safety, and welfare of the inhabitants of the Town.

11. Pipelines under 125 psi and less than 6" diameter are presently not regulated by the federal or New York state governments, yet may pose many the same dangers as larger, regulated lines when ruptured; and, in any event, these pipelines require a clear zone for inspections, maintenance, and access. The Town Board believes it is appropriate to evaluate whether it is advisable to develop a policy to address such otherwise unregulated pipelines, and if so, to enact such a policy.

12. The Town has not been the home of heavy industrial activity in the past, and thus the Town Board believes it is appropriate to evaluate development and enactment of legislative standards to ensure that any industrial activity contemplated for the Town take place only if compatible with present land uses and the Town's Comprehensive Plan.

13. The evaluation and determination of whether the activities described in Article 3, Section 4 of this Local Law are appropriate for the Town and are a legitimate goal of land use policies and laws. There is no question that exclusion of specified industrial uses is a legitimate goal of such laws. As the United States Supreme Court stated in *Town of Belle Terre v. Borass*, 416 U.S. 1 (1974):

*...the concept of public welfare is broad and inclusive.... The values that it represents are spiritual as well as physical, aesthetic as well as monetary. It is within the power of the [local] legislature to determine that the community should be beautiful as well as healthy, spacious as well as clean, well-balanced as well as carefully patrolled.*

416 U.S. at 6.

Further, in *Matter of Gernatt Asphalt Products, Inc. v. Town of Sardinia*, 87 N.Y. 2d 668 (1996), the Court of Appeals, New York State's highest court, evaluated a claim that a town's prohibition of mining throughout the town was in effect unconstitutional 'exclusionary zoning.' The Court of Appeals held as follows:

*We have never held, however, that the ... ['exclusionary zoning'] test, which is intended to prevent a municipality from improperly using the zoning power to keep people out, also applies to prevent the exclusion of industrial uses. A municipality is not obliged to permit the exploitation of any and all natural resources within the town as a permitted use if limiting that use is a reasonable exercise of its police power to prevent damage to the rights of others and to promote the interests of the community as a whole.*

87 N.Y. 2d at 683, 684 (*emphasis added*).

C. The purpose of this Local Law is to provide the Town with a period of time to consider, and if appropriate to draft and to enact, one or more local laws to identify and designate wetlands and critical environmental areas, develop aquifer protection legislation, develop a road use policy, and/or prohibit the activities described in Article 3, Section 4 of the Local Law. At this time, it appears to the Town Board that an extension to the existing moratorium of one (1) year in duration, coupled with a mechanism for a 'hardship exemption' procedure, will achieve an appropriate balancing of interests between (on the one hand) the public need to safeguard the character and other resources of the Town and the health, safety and general welfare of its residents, and (on the other) the rights of individual property owners or businesses desiring to conduct such activities during such period.

### Section 3. DEFINITIONS

For purposes of this Local Law, the following terms shall have the meanings respectively set forth below:

Agriculture Use - Land used for the production of crops and/or livestock and livestock products (as those terms are defined at Section § 301 of the New York State Agriculture and Markets Law).

Below-Regulatory Concern - Radioactive material in a quantity or of a level that is distinguishable from background levels (as that phrase is defined at 10 CFR §20.1003), but which is below the regulation threshold established by any regulatory agency otherwise having jurisdiction over such material in the Town.

Gathering Line, Or Production Line - Any system of pipelines (and other equipment such as, but not limited to, drip stations, vent stations, pigging facilities, valve box, transfer pump station, measuring and regulating equipment, yard and station piping, and cathodic protection equipment), used to move or transport oil, gas, or liquids from a point of production, treatment facility, or storage area to a transmission line, which is exempt from the Federal Energy Regulatory Commission's jurisdiction under section 1(b) of the Natural Gas Act, and which does not meet the definition of a "Major utility transmission facility" under the Public Service Law of New York, Article 7, §120(2)(b).

Injection Well - A bored, drilled, or driven shaft whose depth is greater than the largest surface dimension, or a dug hole whose depth is greater than the largest surface dimension, through which fluids (which may or may not include semi-solids) are injected into the subsurface and less than ninety (90) percent of such fluids return to the surface within a period of ninety (90) days.

Land Application Facility - A site where any Natural Gas Exploration And/Or Petroleum Production Wastes are applied to the soil surface or injected into the upper layer(s) of the soil.

Natural Gas - Methane and any gaseous substance, either combustible or non-combustible, which is produced in a natural state from the Earth and which maintains a gaseous or rarefied state at standard temperature and pressure conditions, and/or gaseous components or vapors occurring in or derived from petroleum or other hydrocarbons.

Natural Gas And/Or Petroleum Exploration Activities - Geologic or geophysical activities related to the search for natural gas, petroleum, or other subsurface hydrocarbons, including prospecting and geophysical and geologic seismic surveying and sampling techniques, *but only to the extent* that such activities involve or employ core, rotary, or any other type of drilling, or otherwise involve the making of any penetration or excavation of any land or water surface in the search for and evaluation of natural gas, petroleum, or other subsurface hydrocarbon deposits.

Natural Gas And/Or Petroleum Extraction Activities - The digging or drilling of a well for the purposes of exploring for, developing, or producing natural gas, petroleum, or other subsurface hydrocarbons, including, without limitation, any and all forms of shale fracturing.

Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes - Any of the following in any form, and *whether or not* such items have been excepted or exempted from the coverage of any federal or state environmental protection laws, or have been excepted from statutory or regulatory definitions of "industrial waste," or "hazardous" or "toxic" substances, materials, or wastes, and whether or not such substances are generally characterized as waste: (a) below-regulatory concern radioactive material, or any radioactive material which is not below-regulatory concern, but which is in fact not being regulated by the regulatory agency otherwise having jurisdiction over such material in the Town, whether naturally occurring or otherwise, in any case relating to, arising in connection with, or produced by or incidental to the exploration for, the extraction or production of, or the processing, treatment, or transportation of natural gas, petroleum, or any related hydrocarbons; (b) natural gas or petroleum drilling fluids; (c) natural gas or petroleum exploration, drilling, production or processing wastes; (d) natural gas or petroleum drilling treatment wastes (such as oils, frac fluids, produced water, brine, flowback, sediment and/or any other liquid or semi-liquid material); (e) any chemical, waste oil, waste emulsified oil, mud, or sediment that was used or produced in the drilling, development, transportation, processing or refining of natural gas or petroleum; (f) soil contaminated in the drilling, transportation, processing or refining of natural gas or petroleum; (g) drill cuttings from natural gas or petroleum wells; or (h) any other wastes associated with the exploration, drilling, production or treatment of natural gas or petroleum. This definition specifically intends to include some wastes that may otherwise be classified as "solid wastes which are not hazardous wastes" under 40 C.F.R. § 261.4(b). The definition of Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes *does not include* (i) recognizable and non-recognizable food wastes, or (ii) waste generated by Agriculture Use.

Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes Disposal/Storage Facility - Any of the following: (a) tanks of any construction (metal, fiberglass, concrete, etc.); (b) impoundments; (c) pits; (d) evaporation ponds; or (e) other facilities, in any case used for the storage or treatment of Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes that: (i) are being held for initial use, (ii) have been used and are being held for subsequent reuse or recycling, (iii) are being held for treatment, or (iv) are being held for storage.

Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes Dump - Land upon which Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes, or their residue or constituents before or after treatment, are deposited, disposed, discharged, injected, placed, buried or discarded, without any intention of further use.

Natural Gas And/Or Petroleum Support Activities - Shall mean and be any one or more of the following: (a) a Natural Gas Compression Facility; (b) a Natural Gas Processing Facility; (c) a Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes Disposal/Storage Facility; (d) a Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes Dump; (e) a Land Application Facility; (f) Non-Regulated Pipelines; (g) Underground Injection; or (h) Underground Natural Gas Storage.

Natural Gas Compression Facility - Those facilities, or combinations of facilities, that move or transport natural gas or petroleum from production fields or natural gas processing facilities in pipelines or into storage; the term shall include equipment for liquids separation, natural gas dehydration, and tanks for the storage of waste liquids and hydrocarbon liquids.

Natural Gas Processing Facility - Those facilities that separate and recover natural gas liquids, (NGLs) and/or other non-methane gases and liquids from a stream of produced natural gas, using equipment for any of the following: cleaning or stripping gas; cooking and dehydration; residual refinement; treating or removing oil or condensate; removing water; separating NGLs; removing sulfur or carbon dioxide; fractionation of NGLs; and/or the capture of CO<sub>2</sub> separated from natural gas streams.

Non-Regulated Pipelines - Those pipelines that are exempt or otherwise excluded from regulation under federal and state laws regarding pipeline construction standards or reporting requirements, and specifically including production lines and gathering lines.

Person - Any individual, public or private corporation for profit or not for profit, association, partnership, limited liability company, limited liability partnership, firm, trust, estate, and any other legal entity whatsoever which is recognized by law as the subject of rights and duties.

Pipeline - All parts of those physical facilities through which petroleum, gas, hazardous liquids, or chemicals move in transportation (including pipes, valves, and other equipment and appurtenances attached to pipes, together with other appurtenant or related equipment such as drip stations, vent stations, pigging facilities, valve boxes, transfer pump stations, measuring and regulating equipment, yard and station piping, and cathodic protection equipment), whether or not laid in public or private easements or a private right of way within the Town. This includes, without limitation, gathering lines, production lines, and transmission lines.

Radioactive Material - Material in any form that emits radiation. This definition specifically includes NORM (naturally occurring radioactive material), but only if such naturally occurring

material has been moved from its naturally occurring location through an industrial process. All such material is “radioactive material” for purposes hereof, whether or not it is otherwise exempt from licensing and regulatory control pursuant to the NYS Department of Labor, the US Nuclear Regulatory Commission, the US Environmental Protection Agency, the US Department of Energy, the US Department of Transportation, or any other regulatory agency.

Radiation - The spontaneous emission of particles (alpha, beta, neutrons) or photons (gamma) from the nucleus of unstable atoms as a result of radioactive decay.

Subsurface - Below the surface of the Earth or of a body of water, as the context may require.

Town - The Town of Genoa, Cayuga County, New York.

Town Board - The Town Board of the Town.

Transmission Line - A pipeline that transports oil, gas, or water to end users as a public utility and which is subject to regulation either by: (a) the Federal Energy Regulatory Commission’s jurisdiction under section 1(b) of the Natural Gas Act; or (b) as a “Major utility transmission facility” under the Public Service Law of New York, Article 7, §120(2)(b).

Underground Injection - Subsurface emplacement of Natural Gas And/Or Petroleum Extraction, Exploration Or Production Wastes by or into an Injection Well.

Underground Natural Gas Storage - Subsurface storage, including in depleted gas or oil reservoirs and salt caverns, of natural gas that has been transferred from its original location, whether for the purpose of load balancing the production of natural gas or for any other reason, including without limitation short-term, long-term, or intermittent storage for product quality, processing, or transportation purposes, or because of market conditions. Without limitation, this term includes compression and dehydration facilities, and associated pipelines.

#### Section 4. MORATORIUM AND PROHIBITION.

A. 1. From and after the date of this Local Law, no application for a building permit, certificate of occupancy, or other Town-level approval shall be accepted, processed, approved, approved conditionally, or issued for the construction, establishment, or use or operation of any land, body of water, building, or other structure located within the Town for any of the following: (i) any Natural Gas And/Or Petroleum Exploration Activities; (ii) any Natural Gas And/Or Petroleum Extraction Activities; or (iii) any Natural Gas And/Or Petroleum Support Activities.

2. From and after the effective date of this Local Law, no person shall use, cause, or permit to be used, any land, body of water, building, or other structure located within the Town for any of the following: (i) any Natural Gas And/Or Petroleum Exploration Activities; (ii) any Natural Gas And/Or Petroleum Extraction Activities; or (iii) any Natural Gas And/Or Petroleum Support Activities.

B. The moratorium and prohibition set forth above in sub-Section A. of this Article 3, Section 4 is not intended, and shall not be construed, to: (i) prevent or prohibit the right to use roadways in commerce or otherwise for travel; (ii) prevent or prohibit the transmission of natural gas

through utility pipes, lines, or similar appurtenances for the limited purpose of supplying natural gas to residents of or buildings located in the Town; or (iii) prevent or prohibit the incidental or normal sale, storage, or use of lubricating oil, heating oil, gasoline, diesel fuel, kerosene, or propane in connection with legal Agriculture, residential, business, commercial, and other uses within the Town.

C. The term of this moratorium and prohibition shall begin on the effective date of this Local Law and shall expire on the earlier of (i) that date which is three months after said effective date, or (ii) the effective date of a duly enacted repeal of this Local Law.

#### Section 5. PENALTIES.

A. Failure to comply with any of the provisions of this Local Law shall be an unclassified misdemeanor as contemplated by Article 10 and Section 80.05 of the New York State Penal Law, and, upon conviction thereof, shall be punishable by a fine of not more than One Five Thousand Dollars (\$5,000) [?] or imprisonment for not more than 10 days, or both, for the first offense. Any subsequent offense within a one year period shall be punishable by a fine of not more than Ten Thousand Dollars (\$10,000) or imprisonment for a period of not more than 30 days, or both. For purposes of this sub-Clause A, each day that a violation of this Local Law exists shall constitute a separate and distinct offense.

B. Compliance with this Local Law may also be compelled, and violations restrained, by order or by injunction of a court of competent jurisdiction, in an action brought on behalf of the Town by the Town Board. In the event the Town shall seek any such equitable relief, the Town shall not be required to: (i) show or prove the lack of an adequate remedy in law; or (ii) post any bond or undertaking.

C. In the event the Town desires or is required to take legal action to enforce this Local Law the violator will be responsible for any and all necessary costs and expenses incurred by the Town relative thereto, including attorneys', engineering, consulting, and experts' fees; however, any responsibility or liability therefor, and the amount thereof, shall be determined by a court or other tribunal of competent jurisdiction, and this clause shall be interpreted, construed, and applied only to the maximum extent permitted by applicable law.

#### Section 6. 'GRANDFATHERING' OF LEGAL, PRE-EXISTING NON-CONFORMING USE.

Notwithstanding any provision hereof the contrary, any Natural Gas And/Or Petroleum Extraction Activities that are being conducted in the Town as of the effective date of this Local Law shall be subject to the following:

A.1. If, as of the effective date of this Local Law, substantive Natural Gas And/Or Petroleum Extraction Activities are occurring in the Town, and those activities are in all respects being conducted in accordance with all applicable laws and regulations, including, without limitation, pursuant to and in compliance with all valid permits required to be issued by the New York State Department of Environmental Conservation ("DEC") and any other regulating agencies, then and only then such Activity shall be considered a pre-existing, non-conforming use and shall be allowed to continue, subject, however, to the provisions of sub-Clauses B and C of this Article 3, Section 6.

2. Natural Gas And/Or Petroleum Extraction Activities that are being conducted in the Town as of the effective date of this Local Law which do not qualify for treatment under the preceding sub-Clause A(1) of this Article 3, Section 6 shall not be grandfathered, and shall in all respects be prohibited as contemplated by Article 3, Section 4 hereof.

B. Upon the depletion of any well which is allowed to remain in operation after the effective date of this Local Law by virtue of sub-Clause A(1) of this Article 3, Section 6, or upon any other substantive cessation of Natural Gas And/Or Petroleum Extraction Activities (otherwise grandfathered by virtue of sub-Clause A(1) of this Article 3, Section 6) for a period of more than twelve (12) months, then and in such event the non-conforming use status of such Activity shall terminate, and thereafter such Natural Gas And/Or Petroleum Extraction Activities shall in all respects be prohibited as contemplated by Article 3, Section 4 hereof.

C. Notwithstanding any provision hereof to the contrary, the pre-existing, non-conforming status conferred and recognized by sub-Clause A(1) of this Article 3, Section 6 is not intended, and shall not be construed, to authorize or grandfather any Natural Gas And/Or Petroleum Extraction Activities extending beyond whatever well bore is authorized in any DEC permit in existence as of the effective date of this Local Law. Any expansion or attempted or purported expansion shall not be grandfathered under sub-Clause A(1) of this Article 3, Section 6, and instead shall in all respects be prohibited as contemplated by Article 3, Section 4 hereof. 'Grandfathered' and allowed lawful pre-existing uses neither have nor possess any right to expand such non-conforming use, whether above or below ground, and no such right shall be deemed, so construed, or implied.

#### Section 7. INVALIDITY OF ANY CONFLICTING APPROVALS OR PERMITS.

Except as contemplated by Article 3, Section 8, no permit or approval issued by the Town shall be deemed valid when or to the extent that such permit or approval purports to allow or permit any activity that would violate the moratorium and prohibition set forth at Article 3, Section 4 of this Local Law.

#### Section 8. HARDSHIP EXEMPTION.

A. There is hereby established a mechanism by which Persons aggrieved by a decision or determination of the Town's Code Enforcement Officer (or other administrative official or body charged with the enforcement of this Law) regarding Article 3, Section 4 of this Local Law may make appeal to the Town Board for a Hardship Exemption from the provisions of said Article 3, Section 4. The Town Board shall have the power, upon an appeal from a decision or determination of the Code Enforcement Officer or other administrative official or body charged with the enforcement of this Law, after public notice and hearing and in accordance with the requirements of law and this Local Law, to consider applications for a Hardship Exemption from the provisions of Article 3, Section 4 of this Law. Applicants for a Hardship Exemption should consult the succeeding provisions of this Article 3, Section 8, as well as Article 3, Section 9 of this Local Law, for specification of application requirements and the procedural mechanism(s) applicable to a Hardship Exemption.

B. No such Hardship Exemption shall be granted by the Town Board without a showing by the applicant that enforcement of Article 3, Section 4 of this Law as to such applicant has caused "unnecessary hardship." In order to prove the existence of an unnecessary hardship for

purposes hereof, the applicant must demonstrate each of the following four conditions to the Town Board's satisfaction: (i) that, unless the applicant is granted a Hardship Exemption from the provisions of Article 3, Section 4 of this Law, the applicant cannot realize a reasonable rate of return on the entire parcel of property, and such lack of return is substantial as demonstrated by competent financial evidence; (ii) that the alleged hardship relating to the property in question is unique, and does not apply to a substantial portion of the neighborhood or other area in the vicinity of the applicant's property; (iii) that the alleged hardship has not been self-created; and (iv) that the requested Hardship Exemption, if granted, will not alter the essential character of the neighborhood or other area in the vicinity of the applicant's property in an adverse manner.

1. *Reasonable Rate of Return.* In evaluating whether the applicant can realize a reasonable rate of return for purposes hereof, the Town Board shall examine whether the entire original or expanded property holdings of the applicant (as opposed to only the site of the proposed project) are incapable of producing a reasonable rate of return. No Hardship Exemption shall be granted unless, in addition to satisfying all other applicable provisions of this Local Law, the Town Board finds that the applicant has clearly demonstrated, by detailed written "dollar and cents" proof, the inability to obtain a reasonable return for the entire parcel (and not just the site of the proposed project) unless the applicant is granted a Hardship Exemption from the provisions of Article 3, Section 4 of this Law.

2. *Unique Hardship.* No Hardship Exemption shall be granted unless, in addition to satisfying all other applicable provisions of this Local Law, the Town Board finds that the entire parcel of which the project is a part possesses unique characteristics that distinguish it from other properties in the neighborhood, or from other areas in the vicinity of the applicant's property. The applicant must demonstrate the unique nature of the parcel as a whole. The fact that the improvements already existing at the time of the application are old, obsolete, outmoded, or in disrepair, or the fact that the property is then unimproved, shall not be deemed sufficient to make the plight of the property unique or to contribute thereto. Exceptional topography is an example of a factor demonstrating the unique nature of the property.

3. *Self-Created Hardship.* The Town Board may find that the applicant suffers from a self-created hardship in the event that the Board finds, *inter alia*, that: (i) the applicant's inability to obtain a reasonable return on the property as a whole results from having paid too much for the property, or that such inability arises from a poor investment decision; (ii) the applicant previously divided the property and is left with only a portion which suffers from some unique condition for which relief is sought, which condition did not either previously exist or previously apply to the parcel as a whole; or (iii) when the applicant purchased the property, he or she knew or should have known that the property was subject to this Local Law.

4. *Adverse Alteration of Essential Character of the Neighborhood or Other Area in Vicinity.* In making its determination of whether the proposed project will adversely affect the essential character of the neighborhood or other area in the vicinity of the applicant's property, the Town Board shall take into account factors that are of vital importance to the citizens of the Town including, without limitation: (i) the rural, residential, agricultural, and historic character of the area and the Town; (ii) the impacts to the Town's irreplaceable recreational, scenic, and tourism sites; (iii) the extent and likelihood of the creation or exacerbation of

any hazard to life, limb, or property that may result from the proposed project; (iv) public health impacts; (v) the social and economic impacts of traffic congestion, noise, dust, odors, emissions, solid waste generation, and other nuisances; (vi) impacts upon property values; and (viii) whether the applicant will use a type or style of development that will result in degradation to the air quality, water quality, or to the historic, scenic, and natural resources of the Town. In order to find that the proposed project does not alter the essential character of the neighborhood or other area in the vicinity of the applicant's property, the Town Board shall interpret the public interest in said essential character of the neighborhood or other area to require, at a minimum, that the project will not do any of the following: (x) pose a threat to the public safety, including public health, water quality, or air quality, (y) cause an extraordinary public expense, or (z) create a nuisance.

C. In addition to any other application requirements from time to time established pursuant to, or made applicable to, this Local Law, an application for any Hardship Exemption shall contain a typewritten narrative explaining what the application is for and how the project meets or exceeds all of the required criteria for a Hardship Exemption. In addition, such application shall also provide documentary evidence or a typewritten narrative addressing and/or explaining each and all of the following:

1. With respect to a claim that the applicant cannot realize a reasonable rate of return, the applicant shall provide written financial evidence containing reasonable specification of the nature and factual particulars of such claim, including, at a minimum (as to the entire parcel of which the proposed project is a part), specification of the following: (a) the date(s) of acquisition of the property; (b) the purchase price; (c) present value of the property; (d) the amount of real estate taxes; (e) the amount of mortgages or liens and other expenses; (f) the asking price for the property when it had been offered for sale; (g) the costs of demolishing any existing structures on the property; (h) efforts to market the property; (i) a schedule of all other property in common ownership at either the date of the enactment of this Law or thereafter; and (j) "dollars and cents proof" such as appraisals, economic studies, and any other such evidence supporting the applicant's contention that the grant of a Hardship Exemption is appropriate. For purposes hereof, "common ownership" means all other interests in property either located within the Town or contiguous to the Town that is held by the any of the applicants (if more than one), whether such ownership is of a legal or equitable interest, in whole or in part, contiguous or not, and whether such property interest is held by any of the applicants through a legal or equitable interest in a(nother) corporation, partnership, trust, business, entity, association, fund, joint venture, or individually.

2. With respect to a claim that, if granted, the requested Hardship Exemption will not adversely alter the essential character of the neighborhood or other area in the vicinity of the applicant's property, the applicant must demonstrate that the proposed project will not adversely affect such essential character with regard to the physical, economic, social, or environmental elements or characteristics of the applicable neighborhood or other area. Examples of adverse impacts to the essential character of the neighborhood or other area include (without limitation) decreased quality or increased quantity of stormwater runoff, increased soil erosion, increased traffic congestion, decreased road quality, impairment of the scenic or rural character of roads, increased noise, dust, odor and/or glare, reduced wildlife habitat, decreased air quality, decreased water quality, impairment of the viewshed, creation of solid wastes, negative impacts on sustainability efforts, increased

social costs, increased emergency response times, negative impacts to public infrastructure, decreased property values, and negative impacts on the health of area residents.

D. In addition to all other application requirements from time to time established pursuant, or made applicable to, this Local Law, each application for a Hardship Exemption shall include (without limitation) the following reports in writing, so as to assist the Town Board in determining whether a grant of the requested Hardship Exemption will adversely alter the essential character of the neighborhood or other area in the vicinity of the applicant's property:

1. Environmental Assessment Form. A completed draft of a Long Form Environmental Assessment Form, Part I, regarding the proposed project.

2. Description of Surrounding Uses. The approximate location of all neighboring residential, hamlet, park/recreational, and/or agricultural areas, all county-designated Unique Natural Areas and locally designated Critical Environmental Areas (if any), all wetlands, any intermittent, seasonal and other streams, rivers, and waterways, any significant natural communities, any mapped or existing endangered and threatened species and species of concern, and any historical or archeologically sensitive or mapped areas within a two (2) mile radius of the perimeter of the site of the proposed use.

3. Traffic Impact Report. A traffic impact report containing: (a) the proposed traffic circulation plan and the projected number of motor vehicle trips to enter or leave the site, estimated for daily and peak hour traffic levels, if the Hardship Exemption is granted; (b) existing and proposed daily and peak traffic hour levels as road capacity levels; (c) a determination of the area of impact of traffic going to and departing from the proposed project site; (d) the proposed traffic routes to the nearest intersection with an arterial highway, including the gross weights and dimensions of vehicles; (e) the projected traffic flow pattern, including vehicular movements at all major intersections likely to be affected by the proposed project if the Hardship Exemption is granted; (f) the impact of this traffic upon existing abutting public and private ways in relation to existing road capacities; (g) a traffic impact analysis of the effects of the proposed project on the transportation network in the Town using passenger car equivalents if the Hardship Exemption is granted; (h) an articulation of the effects and impacts of the proposed project on traffic based on existing conditions and projected future background traffic on the state, county, and Town road system if the Hardship Exemption is granted; (i) an evaluation of whether the resulting traffic conditions are likely to hinder the passage of police, fire and emergency response vehicles, or degrade the quality of life, and/or otherwise contribute to hazardous traffic conditions if the Hardship Exemption is granted; and (j) a determination of whether there is sufficient road geometry and frontage to allow vehicles to enter and depart from the site by only entering the lane of desired travel, and remaining solely in such lane of travel, to the nearest intersection (along the proposed route of travel) with a County or State public highway.

4. Road Impact Report. An evaluation of: (a) appropriate roadway geometry including required road widths, bridge widths, starting and stopping sight distances, intersection sight distances, and horizontal and vertical curves along the proposed traffic routes; (b) the adequacy of existing pavement and structures along the proposed traffic routes to accommodate the full weight load of any trucks and construction vehicles likely to be used

in connection with the proposed project if the Hardship Exemption is granted; and (c) impacts to the rural or scenic character of any roads along the proposed traffic route if the Hardship Exemption is granted.

5. Transportation Plan. A description of ingress and egress to and through the proposed project site by which vehicles, equipment, and supplies will be delivered, including: (a) any temporary or permanent access routes or points provided, or to be provided, during and after construction if the Hardship Exemption is granted; and (b) an identification of any roads, streets, intersections, bridges, and other facilities along the proposed traffic route that do not meet New York State Department of Transportation standards. Such plan shall describe any anticipated improvements to existing roads, bridges, or other infrastructure, any new road or access construction, measures which will be taken to avoid damaging any public or private roads, highways, culverts, or other ways or appurtenances, and the measures that will be taken to restore damaged public or private roads, highways, culverts, or other ways or appurtenances following construction and during operations should the Hardship Exemption be granted; all together with any measures proposed to be taken to maintain the scenic and/or rural characteristics of such roads or ways.

6. Noise Impact Report. A report that shall measure, project, factor, cover, and provide conclusions about, without limitation, low frequency, A-weighted, infrasound, pure tone, and repetitive/impulse noises containing the following information, studies, or descriptions and conclusions: (a) a description of the existing audible conditions at the project site to identify a baseline sound presence and preexisting ambient noise, including seasonal variation; (b) a description and map of sound producing features of the proposed project from any noise generating equipment and noise generating operations that will be conducted in connection with the proposed project site if the Hardship Exemption is granted, including noise impacts from vehicular traffic travelling within the Town to and from the proposed project; (c) with respect to the noise to be generated by construction and use of the proposed project, the range of noise levels and the tonal and frequency characteristics expected, and the basis for such expectation; (d) a description and map of the existing land uses and structures, including any sensitive area sound receptors (e.g., residences, hospitals, libraries, schools, places of worship, parks, and areas with outdoor workers, etc.) within one mile of the project parcel boundaries, which description shall include the location of the structure/land use, the distances from the proposed project, and the expected decibel readings for each such receptor; and (e) a description of the project's proposed noise-control features, including specific measures proposed to protect off-site workers and mitigate noise impacts for sensitive area receptors.

7. Visual Assessment. A visual presentation of how the site of the proposed project will relate to and be compatible with the adjacent and neighboring areas, within a two mile radius of the perimeter of the site of the proposed project, if the Hardship Exemption is granted. This presentation shall include computerized photographic simulation showing the site during construction and fully developed which shows and/or demonstrates any visual impacts from at least four strategic vantage points within the said two mile radius. Color photographs of the proposed site from at least two locations accurately depicting the existing conditions shall be included. The study shall also indicate the color treatment of the facility's components and any visual screening incorporated into the project that is intended to lessen visual prominence.

8. Report of Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes and Other Wastes. A report containing a description of Natural Gas and/or Petroleum Extraction, Exploration or Production Wastes and other solid wastes, industrial wastes, hazardous wastes, toxic and/or poisonous substances and pollutants (whether or not any such substances enjoy exemption or definitional exceptions from state or federal laws otherwise intended to protect the public with respect to hazardous, toxic, or poisonous substances) expected to be produced, stored, injected, discarded, discharged, disposed, released, or maintained on the project site if the Hardship Exemption is granted.

9. Compatible Uses Report. A discussion of characteristics of the proposed project that may decrease the Town's and/or the neighborhood's (or other area's) suitability for other uses such as residential, commercial, historical, cultural, tourism, recreational, environmental, or scenic uses if the Hardship Exemption is granted.

10. Fiscal Impact Assessment. An assessment describing the adverse effects and impacts on Town revenue and costs necessitated by additional public facility and service costs likely to be generated by the proposed project if the Hardship Exemption is granted.

11. Fire Prevention, Equipment Failure and Emergency Response Report. A report containing: (a) description of the potential fire, equipment failures, and emergency scenarios associated with the proposed project that may require a response from fire, emergency medical services, police, or other emergency responders, if the Hardship Exemption is granted; (b) an analysis of the worst case disaster associated with the proposed project if the Hardship Exemption is granted, together with an impact analysis of such a disaster upon the health, safety, and welfare of the inhabitants of the Town and their property; (c) an identification and designation of the specific agencies that would respond to potential fires, equipment failures, accidents, or other emergencies if the Hardship Exemption is granted; (d) a description of all emergency response training and equipment needed to respond to a fire, accident, equipment failures, or other emergencies, including an assessment of the training and equipment resources available to local and potential responding agencies; and (e) the approximate or exact location of all fire, police, and emergency response service facilities within a five mile radius of the perimeter of the site of the proposed use.

12. Public Facilities and Services Assessment. An assessment describing: (a) whether current Town public facilities and services, including water supply, fire protection, school services, recreation facilities, police protection, roads, and stormwater facilities are adequate for the proposed project (taking into account all other uses that have been permitted or are currently operating in the Town) if the Hardship Exemption is granted; (b) a comparison of the capacity of the public services and facilities to the maximum projected demand that may result from the proposed project if the Hardship Exemption is granted (in determining the effect and impact of the proposed project on fire, police, and emergency services, the review shall take into consideration response times, and the number and location of available apparatus and fire, police, and emergency service stations that are manned by full time professional service personnel; and where applicable, calculation of response times shall also include the time it takes volunteer emergency personnel to get to their stations); and (c) a review of the impacts, if the Hardship Exemption is granted, of the proposed project on safety of all children going to and from school by car, bus, bicycle, and walking during and outside of school zone hours, and

whether safety measures, such as signaled crosswalks or elevated sidewalks, exist along intended vehicle traffic routes so as to aid in prevention of accidents.

13. Property Value Assessment. A property value analysis showing the impact upon adjoining property values, prepared by a licensed appraiser in accordance with industry standards, if the Hardship Exemption is granted.

14. Health Impact Assessment. A human health impact assessment identifying ways in which the proposed project could adversely affect the health of Town residents if the Hardship Exemption is granted; including a priority list of recommendations to minimize the potential health impacts of the proposed project. The health impact assessment shall, at a minimum, include: (a) a risk assessment of the possible impacts of chemical exposure on the health of residents, including the Chemical Abstract Service number of all chemicals proposed to be transported to, used, generated, or stored at the project site; (b) an assessment of possible health effects due to industrial operations in non-industrial areas or zones; and (c) an assessment of possible health effects due to community changes, including the presence of an industrial activity in a previously non-heavy industrial area, declining property values, impacts to the education system, and sudden changes in population numbers, demographics, and customs (if any).

#### Section 9. HARDSHIP EXEMPTION APPLICATION PROCEDURES; TOWN BOARD CONSIDERATION PROCEDURE.

A. Every application for a Hardship Exemption shall be in writing on forms from time to time prescribed by the Town Board, and shall be signed by the applicant. If the applicant is not the owner of the property involved, the owner of the property shall nonetheless attest to the accuracy of the statements and representations made in the application, and both the applicant and the owner shall certify that he (or she or it) has undertaken due diligence with respect to the accuracy of the matters contained in the application. Ten copies of the application and supporting documentation shall be filed with the Town Board, accompanied by a fee in an amount set from time to time by resolution of the Town Board. The Town Board is hereby authorized to adopt rules and regulations for the conduct of hearings on applications for Hardship Exemptions, consistent with this Local Law and other applicable statutes and requirements.

B. In evaluating an application for a Hardship Exemption the Town Board shall comply with any applicable provisions of the State Environmental Quality Review Act ("SEQRA"), codified as Article 9 of the Environmental Conservation Law, and including the implementing regulations codified in Title 6, Part 617 of the New York Codes Rules and Regulations, as the same may from time to time be amended.

C. The Town Board shall schedule a hearing on all applications for a Hardship Exemption within 62 days of the date of filing of a complete application therefor. Said 62-day period may be extended by mutual agreement of the Town Board and the applicant, or whenever required by law, including but not limited to the completion of any required SEQRA procedures. Public notice of the hearing shall be given at least five days prior to the date thereof by publication in the Town's official newspaper. The Town Board may adjourn or continue such public hearing from time-to-time. The cost of sending or publishing any notices relating to any application shall be borne by the applicant and paid to the Town Board prior to the hearing. At least five

days before any hearing on any application for a Hardship Exemption, the Town Board shall mail all notices that the Attorney for the Town may advise are necessary or advisable (such as, for example, notices to abutters and notices that may be required by Section 239-m of the NYS General Municipal Law).

D. In addition to such other procedures as may be required by applicable law, the following shall apply with respect to the conduct of hearings regarding applications for Hardship Exemptions: (a) the burden of proof shall remain with the applicant to show that he (or she or it) has satisfied the conditions necessary to qualify for a Hardship Exemption, and the burden shall never shift to the Town; (b) any party may appear in person or by agent or by attorney; (c) no decision or determination shall be made except upon consideration of the record as a whole and as supported by and in accordance with substantial evidence; (d) all evidence shall be made a part of the record; and (e) official notice may be taken of all facts of which judicial notice could be taken, and of other facts within the specialized knowledge of the Town Board. When official notice is taken of a material fact not appearing in the evidence or the record, every party shall be given notice thereof and shall, upon a timely request, be afforded an opportunity prior to decision to dispute the fact or its materiality.

E. Decisions by the Town Board on applications for a Hardship Exemption shall be made within 62 days from the close of the public hearing on such matter. Said 62-day period may be extended by mutual agreement of the Town Board and the applicant, or whenever required by law, including but not limited to the completion of any required SEQRA procedures. The final decision on such matter shall be made by written order signed by the Town Supervisor. Such decision shall state the findings of fact that were the basis for the Town Board's determination. The Town Board's decision as to each application for a Hardship Exemption shall be filed in the office of the Town Clerk no later than five business days after the day such decision is rendered, and shall be made a public record.

F. The Town Board, in the granting of Hardship Exemptions, shall grant only the minimum level of exception, waiver, or exemption that it shall deem necessary and adequate to allow an economically beneficial use of the property, and at the same time preserve and protect the essential character of the neighborhood and the health, safety and welfare of the community.

G. The Town Board, in the granting of Hardship Exemptions, shall have the authority to impose such reasonable conditions and restrictions as are directly related to and incidental to the proposed project. Such conditions shall be consistent with the spirit and intent of this Local Law, and shall be imposed for the purpose of minimizing any adverse impact such Hardship Exemption may have on the neighborhood or other area in the vicinity of the applicant's property. Such conditions may include, but are not limited to, landscaping, lighting, access and egress, signage, screening, the location and layout of buildings, and limitations upon the use or characteristics of the use which are reasonably related to the public health, safety and general welfare and as may be necessary to carry out the intent of this Local Law. If the applicant refuses to accept such requirements and conditions, the Hardship Exemption shall be denied. No action in violation of the requirements of Article 3, Section 4 of this Local Law shall be conducted under or pursuant to any Hardship Exemption unless in strict compliance with any conditions and/or restrictions stated in such decision or order granting such Hardship Exemption.

H. Any person aggrieved by a decision of the Town Board with respect to an application for a Hardship Exemption may apply to the Supreme Court for review by proceedings under Article 78 of the Civil Practice Law and Rules. Such proceedings must be instituted no later than thirty (30) days after the filing of the Town Board's decision in the Town Clerk's office.

I. Any grant by the Town Board of a Hardship Exemption shall expire if a building permit for the proposed project is not obtained by the applicant within one hundred twenty (120) days from the date of the decision granting such Hardship Exemption.

J. Whenever the Town Board denies an application for a Hardship Exemption, the Town Board shall refuse to hold further hearings on the same application or any substantially similar application by the same property owner, or his successors or assigns, for a period of one year following such denial, unless the Town Board shall find and determine from the information supplied that changed conditions have occurred relating to the promotion of the public health, safety, convenience, comfort, prosperity and general welfare and that a reconsideration is justified.

#### Section 10. SEVERABILITY.

If any word, phrase, sentence, part, section, subsection, or other portion of this Local Law, or the application thereof to any person or to any circumstance, is adjudged or declared invalid or unenforceable by a court or other tribunal of competent jurisdiction, then, and in such event, such judgment or declaration shall be confined in its interpretation and operation only to the provision of this Local Law that is directly involved in the controversy in which such judgment or declaration is rendered, and such judgment or declaration of invalidity or unenforceability shall not affect or impair the validity or enforceability of the remainder of this Local Law or the application hereof to any other persons or circumstances. If necessary as to such person or circumstances, such invalid or unenforceable provision shall be and be deemed severed herefrom, and the Town Board hereby declares that it would have enacted this Local Law, or the remainder hereof, even if, as to particular provisions and persons or circumstances, a portion hereof is severed or declared invalid or unenforceable.

#### Section 11. SUPERSEDING INTENT AND EFFECT.

During the time this Local Law is in effect, it is the specific intent of the Town Board to supersede any inconsistent provisions of any and all other local ordinances, local laws, or local resolutions or other legislation or policies of the Town.

#### Section 12. GENERAL PROVISIONS.

A. The Code Enforcement Officer is hereby designated as the enforcement officer for purposes of interpreting and enforcing this Local Law. The Town Board reserves the right, by resolution to change or designate additional enforcement officers.

B. The section and other headings and titles to clauses and phrases in this Local Law are for convenience only, and shall not be used or construed to limit or define the scope or application of the clauses and phrases so following such headings or titles. Each section of this Local Law, whether in the nature of a preamble or otherwise, is a material part of this Local Law.

Section 13.        EFFECTIVE DATE.

This Local Law shall take effect immediately upon filing with the New York Department of State.

**ARTICLE 5. TERM.**

The moratorium imposed by this Local Law shall be in effect for a period of three months from the effective date of this Local Law.
